

LIVESTOCK CERTIFICATION

CATEGORY REQUIREMENTS

Open Heifers – Our specifications guarantee that these cattle have received an 8 or 9 way clostridial (blackleg) vaccine, a killed or modified live respiratory vaccine and dewormer at least 2 weeks prior to the sale. They have been owned by the seller for 100 days or more. These heifers are at least 600 pounds and under 2 years of age to ensure that they are satisfactory breeders and will be ready for a bull of your choice soon!

Bred Heifers – Our specifications and requirements guarantee that these heifers have received an 8 or 9 way clostridial (blackleg) vaccine, a killed respiratory vaccine with leptospirosis protection and dewormer at least 2 weeks prior to the sale. The seller of these animals has maintained ownership for 150 days or more. These heifers are a minimum of 800 pounds and a maximum age of 3 years. They will all be in their 2nd or 3rd trimester. This helps us to make sure they are at an adequate size and weight to deliver their first calves out of registered bulls.

1st Calf Heifer Pairs (Open) – We guarantee that these 1st calf heifers, which are under 4 years of age and at least 800 pounds, are vaccinated with an 8 or 9 way clostridial (blackleg) vaccine, vaccinated with a killed respiratory vaccine containing the common leptospirosis strains, and dewormed at least 2 weeks prior to the sale. The heifers have been owned by the seller for a minimum of 100 days. All calves, which are at least 2 months of age, have received a clostridial 8 or 9 way (blackleg) vaccine, a killed or modified live respiratory vaccine, and dewormer at least 2 weeks prior to sale. These heifers are verified open by a licensed veterinarian. We strive to sell heifers and calves that will be at optimal health upon arrival to their new home.

1st Calf Heifer Pairs (Exposed) – We guarantee that these 1st calf heifers, which are under 4 years of age, are vaccinated with an 8 or 9 way clostridial (blackleg) vaccine, vaccinated with a killed respiratory vaccine containing the common leptospirosis strains, and dewormed at least 2 weeks prior to the sale. These 800 plus pound heifers have been owned by the seller for a minimum of 100 days. All calves, which are at least 2 months of age, have received a clostridial 8 or 9 way (blackleg) vaccine, a killed or modified live respiratory vaccine, and dewormer at least 2 weeks prior to sale as well. These heifers have been exposed to a registered bull, with information available upon request.

Bred Cows – These 5 year old and younger bred cows have been owned for a minimum of 100 days and are confirmed bred by a licensed veterinarian to be in their 2nd or 3rd trimester. They are all bred to registered bull(s) whose information will be available upon request. They have been vaccinated with an 8 or 9 way clostridial (blackleg) vaccine, vaccinated with a killed respiratory vaccine containing leptospirosis, and dewormed all 2 weeks or more prior to the sale.

Cows with Calves (Open) – Just like our advertised bred cows, these are also 5 years or younger and are in their prime. They have been owned for 100 days or more by the seller and are confirmed open by a licensed veterinarian. They have received an 8 or 9 way clostridial (blackleg) vaccine, been vaccinated with a killed respiratory vaccine containing the most common strains of leptospirosis, and dewormed at least 2 weeks prior to the sale. These cows are perfect for someone looking for recip cows or looking to breed the cows to a bull of their choice while still enjoying the benefits of having a 2 month or older calf on the ground.

CATEGORY REQUIREMENTS

Cows with Calves (Open) – Just like our advertised bred cows, these are also 5 years or younger and are in their prime. They have been owned for 100 days or more by the seller and are confirmed open by a licensed veterinarian. They have received an 8 or 9 way clostridial (blackleg) vaccine, been vaccinated with a killed respiratory vaccine containing the most common strains of leptospirosis, and dewormed at least 2 weeks prior to the sale. These cows are perfect for someone looking for recip cows or looking to breed the cows to a bull of their choice while still enjoying the benefits of having a 2 month or older calf on the ground.

Cows with Calves (Exposed) – These young (5 years old and younger) cows are selling as possible three-in-ones. They've been owned for 100 days or more by the seller and have been exposed to a registered bull. They've been vaccinated with an 8 or 9 way clostridial (blackleg) vaccine, respiratory vaccine with leptospirosis protection, and dewormed all at least 2 weeks prior to the sale. The calves are confirmed healthy at side and are at least 2 months of age at the time of sale.

Registered Bulls – We are offering young registered bulls with paperwork available upon request. They are 15–48 months old, have been owned for 100 days or more, and should be in the stages of optimal breeding. The bulls have been vaccinated with an 8 or 9 way clostridial (blackleg) vaccine, respiratory and leptospirosis vaccine, and a dewormer all within 2 weeks or more from the sale. Within the last 2 months, these bulls have all been fertility and trich tested. All paperwork and results of these tests will accompany the bulls.
